

Quality Metal Fabrication

Gulfex, Inc.

Since 1966, Gulfex has earned a strong reputation as a leader in the metal fabrication industry. Incorporated by President John Curry in 1966, and the addition of Bill Sheehy as Vice President and General Manager in 1971, the organization has continuously developed in size and scope of supply capabilities.

With the advent of the oil boom in the 1970s, Gulfex grew from a 6,900 sq. ft. facility to the 41,000 sq. ft. facility that exists today. Following significant expansions in 1975, 1977 and 1980, our capabilities increased, allowing Gulfex to better serve the industry through larger capacity and greater capability. Over the years, executive management has remained actively involved in all projects to preserve quality and dedication.

At Gulfex, the bottom line is this — **We will do whatever it takes to get the job done, and get it done right the first time, on time.** With a seasoned staff of professionals, including expert engineers, designers, craftsmen, managers and quality assurance specialists, Gulfex has the staff and experience to efficiently complete your project and assist in your success. We are flexible, “can-do” people who realize we can accomplish whatever we set our efforts to do. Allow us to assist in the successful completion of your next project.

Far left: 180" I.D. four pass trayed column in 304 stainless for a Texas chemical plant.

Top: Slug catcher gas header sections, 30" headers with 48" tubes.

Middle: 180" I.D. x 120' tall trayed column.

Bottom: 192" I.D. x 60' process drum for a Texas chemical plant.

Above: 120" I.D. x 85' tall solvent extract trayed column for Houston refinery.

Top right: Feed surge drum 144" I.D. by 41' seam to seam.

Bottom right: 216" I.D. x 145' tall methyl ethylene glycol trayed column for a south Texas chemical plant.

Pressure Vessels

- Towers
- Trayed Columns
- Drums
- Separators/Scrubbers
- Gas Plant Equipment

Skidded Process Systems & Equipment

*Far left:
Power gas
skid.*

*Top:
Demethanizer
tower for
natural gas
liquids plant.*

*Middle:
108" I.D. x 24'
long flare
scrubber
skids for
offshore
platform.*

*Bottom:
High pressure
gas metering
skid for
offshore
platform.*

*Above:
Production manifold skid.*

*Top right:
Medical waste
incinerator for Mexico.*

*Bottom right:
1400 psig slug catcher
assembly. Top barrel is
36" O.D. and 1 1/2"
thick, and bottom
barrel is 72" O.D. and
2 9/16" thick.*

- Skid-Mounted Process Systems
- Skid-Mounted Equipment
- Metering Skids
- Thermal Oxidizers

Hex mesh for a refractory
lined Cat Cracker internal.

Right:
API storage tank
for a Louisiana
chemical plant.

Custom Fabrication

- Large Ductwork
- Pig Launchers and Receivers
- Piping
- Rolled and Welded Cylinders
- Shop-built API Tanks
- Turnaround and Specialty Items
 - Field Service Parts
 - Nozzle and Manway Assemblies and Repads
 - Internals Parts
 - Custom Fabricated Equipment
 - Rapid Turnaround as required

 - Custom Fabricated Equipment
 - Rapid Turnaround as required

Our Capabilities

- Plate rolling up to 1 1/2" thick by 10 ft. wide
- Fabrication of carbon steel and alloy products from nickel alloys (hastelloys, inconel, incoloy, duplexes and clad materials)
- Plasma cutting of alloy plate up to three inches thick
- Weld overlay work
- Various forming processes available

Our Facility

- Consists of 41,000 sq. ft. under roof and more than one acre of lay-down area
- Offers more than 200-ton fabrication capability
- Contains 36-ft. high fabrication bays up to 200 feet long
- Stocks plate from 1/4" to 1 1/2" A516-70 and various 300 series stainless steel
- Conveniently located close to the Port of Houston, Bayport and the Houston Ship Channel

What Sets Gulfex Apart in the Industry

- Quality engineering, design and fabrication products, monitored with quality assurance groups
- Ability to meet tough schedules with a "can-do" attitude
- Reliable and committed to deadlines and budget
- Technical expertise in engineering, design and fabrication
- Engineering and design services utilizing the latest versions of Disasu and AutoCad
- Detailed, comprehensive project management, including status reports and schedules updated bi-weekly on all major projects, to ensure awareness of projects team member needs
- Multi-discipline design projects, including mechanical, structural, instrument and electrical elements
